SNOWFLAKE

AMENDMENT

Customer	Canva Pty Ltd
Order Form	Snowflake Order Form Q-518360

This Amendment ("**Amendment**"), effective as of the last date it is signed below (the "**Amendment Effective Date"**), amends the order form specified above ("**Original Order Form**") by and between the applicable Snowflake entity among the "Contracting Entities" identified at https://www.snowflake.com/legal ("**Snowflake**") and the customer specified above ("**Customer**"). Except as specifically set forth in this Amendment, all terms and conditions of the Original Order Form remain in full force and effect. All capitalized terms not otherwise defined in this Amendment shall have the meanings as ascribed to them in the Original Order Form or the Agreement (as referenced therein).

With respect to the Order Form Q-518360, and any corresponding Additional Capacity Order Form(s) to such Order Form (collectively, the "**Original Order Form(s**)"), Capacity paid but unused under such Order Form as of this Amendment Effective Date in an amount of USD 80,000.00 ("**Applied Amount**") shall be applied to Fees payable for Technical Services hereunder, and the total amount of paid but unused Capacity available under such Order Form is hereby reduced by such Applied Amount.

Snowflake Technical Services

Annual Period	Name	Quantity	Billing	Unit Price / Rate (List)	Unit Price / Rate (Extended)	Extended Fees
1	Custom Fixed Fee (MC)	1.00	Upfront	USD 80,000.00	USD 80,000.00	USD 80,000.00
These Custom Fixed Fee services are described in the SOW and will be provided on a fixed price basis pursuant to the fees set forth herein. The "Term" for delivery of these services will be twelve (12) months unless a different term for this offering is specified in the SOW.						
Technical Services Total					USD 80,000.00	

The Subscription Term notwithstanding, the Term for each of the Technical Services offerings shall be as specified in the table above or, if not specified, twelve (12) months from the Amendment Effective Date. Unless otherwise specified in the applicable SOW, Technical Services will be invoiced in accordance with the billing terms specified in the table above, notwithstanding different billing terms for the Snowflake Service hereunder. Fees for Technical Services billed "Upfront" will be invoiced as of the Order Form Effective Date. "Monthly" Fees will be invoiced at the end of each calendar month based on fees incurred for that month. "Monthly Fixed Amount" Fees will be invoiced ratably in equal monthly installments at the end of each calendar month. "Quarterly" Fees will be invoiced in advance starting on the Order Form Effective Date and quarterly thereafter through the applicable Term. "Billed Upon Completion" Fees are invoiced at the end of each calendar month based on Technical Services completed in that month. All Fees for Technical Services are due and payable subject to the Payment Terms in the Original Order Form.The Technical Services (including any training) procured on this Amendment are further described and provided subject to the applicable Statement(s) of Work as attached to this Amendment or if not attached, as located at www.snowflake.com/legal (the "**SOW**" or "**Statement of Work**"). For clarity and for purposes of this Amendment and the SOW only, (i) any reference to the "Order Form" in this Amendment or the SOW shall mean this Amendment, and (ii) any reference to "**Order Form Effective Date**" in this Amendment or the SOW shall mean the Amendment Effective Date.

The parties agree that this Amendment, the Agreement, and any Order Forms are the complete agreement between the parties and replace any prior oral and/or written communications between the parties concerning this subject matter. By signing below, the parties agree to the terms of this Amendment.

Accepted and agreed to as of the Amendment Effective Date by the authorized representative of the parties:

Order Form Exhibit - TECHNICAL SERVICES SOW

This Statement of Work ("**Statement of Work**" or "**SOW**") sets forth the terms and conditions for the Technical Services provided by Snowflake. This SOW is effective and binding as of the Order Form Effective Date (such date, the "**SOW Effective Date**") and is made and entered into by and between Customer and Snowflake. This SOW shall apply to the provision of the Technical Services described hereunder as of the date Snowflake commences performance of said services.

As used in this SOW, (i) **"Customer"** or "**Canva**" means the entity specified in the Order Form that is purchasing Technical Services; (ii) "**Order Form**" means the Snowflake-approved ordering document to which this SOW is attached; and (iii) "**Snowflake**" means the Snowflake entity specified on the Order Form. Other capitalized terms used but not defined in this SOW will have the same meaning set forth in the Order Form or Agreement.

A. Description of Technical Services

Snowflake will provide Customer with the Technical Services specified in the Order Form subject to the descriptions, terms and conditions in this SOW and the applicable quantities, pricing, hours, time period(s), Term(s), and other scope limits set forth in the Order Form. All Technical Services will be delivered remotely unless otherwise specified in the descriptions below or otherwise agreed to in writing by the parties. For onsite delivery (if applicable), Customer is responsible for ensuring that Snowflake has access to appropriate facilities for delivery of Technical Services, including but not limited to (as applicable), Internet connectivity, presentation equipment and workspaces.

1. Engagement Objectives:

- This is an outcome-based engagement with fixed scope and deliverables as defined in Sections A1-A4. Snowflake will deliver the outcomes detailed in Section A2 of this SOW within the agreed timeframe, subject to Canva meeting its responsibilities in Section A8.
- Build an AI artifact that facilitates and expedites Canva's migration from monolithic DBT models and table structures to the target three-layer architecture
- Re-architect Editor Sessions into target multi-layer model (Conformed, Metrics, Semantic) to validate the migration approach
- Evaluate where AI provides value across analysis, design, and build activities through hands-on application
- Gather evidence and learnings to inform assessment of AI-enabled scale-out viability for remaining domains
- Snowflake will provide project oversight, manage the customer relationship, oversee service delivery against agreed schedule and quality, escalations and risks, and provide progress reporting

2. Engagement Outcomes:

- Production-ready Editor Sessions migration to three-layer star schema architecture
- Prototype AI artifact trained on Canva migration patterns
- Documented qualitative assessment of AI effectiveness across migration activity types
- Documented learnings and observations to support Canva's scale-out planning for remaining domains
- Recommendations for potential Phase scope and approach

3. Deliverables

- **(Milestone 1) Migration:**
  - Remodelled dim_editor_session table into separate data elements across Conformed and Metrics layers
  - Redesigned DBT models that populate the newly modelled tables
  - Star schema data model with separated dimensions and facts
  - 1 semantic view for Snowflake Intelligence
  - Daily Airflow orchestration DAG
  - Solution design and data architecture documentation
- **(Milestone 2) AI Prototype Artifact:**
  - Prototype AI artifact trained on Product Experience domain context (dim_editor_sessions current state, existing DBT patterns, naming conventions, and transformation logic) designed to assist with data structure remodelling, DBT model redesign, and transformation build activities
  - Optimised prompt templates for analysis, design, and build activities
  - Documented effectiveness assessment with observations and recommendations
- **(Milestone 2) Decision Support (in relation to AI Prototype Artefact):**
  - Documented learnings and recommendations for Phase 2

4. In-scope activities

- **(Milestone 1) Migration Delivery:**
  - Analyse existing DBT models and dim_editor_session monolithic table
  - Remodel dim_editor_session into separate data elements in Conformed and Metrics layers
  - Redesign and build DBT models that populate the newly modelled tables
  - Create 1 semantic view for Snowflake Intelligence
  - Configure daily Airflow orchestration
  - Execute integration and data quality testing
- **(Milestone 2) AI Artifact Development:**
  - Extract common DBT patterns, naming conventions, and transformation logic from dim_editor_sessions current state
  - Train AI artifact on Canva-specific migration patterns for data remodelling, DBT redesign, and build activities
  - Develop optimised prompts for analysis, design, and build activities
  - Validate artifact effectiveness on Editor Sessions tasks
  - Document artifact capabilities, limitations, and usage guidelines
- **(Milestone 2) Effectiveness Assessment:**
  - Evaluate AI contribution across activity categories (analysis, design, build)
  - Identify patterns that transfer well vs require customisation

5. Exclusions

- Downstream consumer re-pointing (migration guide provided only)
- Upstream source migration (data consumed as-is)
- Governance implementation (not required per domain owner)
- Decommissioning old tables
- Deployment to UAT and Production (handled by Canva)
- Historical data migration (rebuild from source)
- Other domain migrations (Editor Sessions only)
- Full AI artifact productionisation (prototype only)

6. Snowflake Assumptions

Material deviations from these assumptions may require scope and timeline adjustment

- Snowflake will work exclusively in the development Snowflake environment.
- AI artifact is experimental and will be developed using product experience domain context (including existing DBT models, table structures, naming conventions, and transformation patterns specific to this domain); effectiveness may vary and is not guaranteed.
- All source data currently available in Snowflake; no new ingestion required
- DBT Core (open source) is the transformation platform
- Cortex Code integration with Canva's Snowflake development environment is permitted
- Existing code has sufficient patterns for artifact learning
- The 'production-quality' Editor Sessions migration deliverable refers to code and architecture suitable for production deployment, not actual deployment to production environments (which remains Canva's responsibility as set out in Section A8).
- Snowflake will manage the delivery approach and execution to achieve defined outcomes. Canva collaboration is required for design reviews, approvals, and validation as outlined in Section A8.

7. Dependencies

The following dependencies will need to be delivered by Canva in order for the expected timeframes set out in Section A9 below to be met. Failure to meet these dependencies may impact delivery schedule accordingly and may impact outcomes.

- Onboard Snowflake personnel to Canva's environments prior to engagement commencement
- Access to existing DBT codebase available at engagement commencement
- Provision 3 Snowflake databases (product_experience_*) within 3 business days of engagement commencement
- Provision Airflow environment for orchestration within 5 business days of engagement commencement
- Enable AI development tooling access to Snowflake environment engagement commencement
- Provide technical decisions and approvals within 2 business days of request
- Share existing documentation and coding standards for the Product Experience domain at engagement commencement
- Canva team will approve design reviews within agreed timelines. Where approvals are not provided within stated timeframes, Snowflake may proceed based on reasonable technical assumptions.

8. Canva's Responsibilities:

- Promotion to any other environment, aside from the development Snowflake environment.
- Grant repository access to existing DBT project and all relevant codebases
- Provide SME availability for requirements and validation
- Provide administrative access to newly created databases (Conformed, Metrics, and Semantic layers)
- Meet/deliver the dependencies as outlined in section A7.

9. Indicative Timeline:

	Snowflake Activities	**Canva Activities**
Week 0 (before start)		▪ Onboard Snowflake personnel to Canva's environments ▪ Enable AI development tooling access to Snowflake environment
Week 1	▪ Verify physical data architecture ▪ Current state data architecture analysis ▪ Design star schema target model	▪ Access to existing DBT codebase (day 1) ▪ Provision 3 Snowflake databases (product_experience_*) ▪ Provision Airflow environment for orchestration ▪ Share existing documentation and coding standards for the Product Experience domain ▪ Provide administrative access to newly created databases
Week 2	▪ Transformation layer current state analysis ▪ Transformation layer target state design	▪ Design approval for target state
Week 3	▪ Conformed layer structural build ▪ Metrics layer structural build ▪ Transformation layer target state build	
Week 4	▪ Semantic layer requirement analysis & discovery ▪ Semantic layer design	
Week 5	▪ Semantic layer design ▪ Semantic layer build	
Week 6	▪ Semantic layer build ▪ Orchestration design ▪ Orchestration build	
Week 7	▪ Orchestration build	
Week 8	▪ Testing	

Week 9	▪ Testing ▪ Documentation	▪ Review documentation
Week 10	▪ Documentation ▪ Knowledge Transfer and Handover	▪ Review documentation ▪ Attend Knowledge Transfer session

Milestone Schedule:

	Deliverable	Milestone Description	Target Date
Milestone 1	Product-dim editor ready for migration	Product-dim editor code and architecture suitable for production deployment Note. Actual deployment to production environments remains Canva's responsibility (see Section A8) Deliverables as stated in Section A3 Milestone 1.	**Week 9**
Milestone 2	AI artifact	Artifact capable of expediting the migration of Product – dim Editor session into target state architecture Deliverables as stated in Section A3 Milestone 2.	**Week 10**

B. Payments and Expenses

1. **Fees**. The fees for each Technical Services offering are specified in the Order Form, and Customer agrees to pay such fees pursuant to the payment terms set forth in the Order Form. Any applicable discounts, including any volume purchase agreement discounts, must be reflected in the Order Form to be effective and will only apply to such Order Form. Without limiting its other available remedies, Snowflake may suspend performance of Technical Services until payments are made current, subject to any applicable invoice dispute provision in the Agreement. For avoidance of doubt, where access to a Snowflake Service account is granted to Snowflake, Customer shall be responsible for any consumption within the Snowflake Service account as requested or reasonably necessary for the provision of the Technical Services offering(s).

2. **Expenses.** If estimated expenses, such as reasonable travel, hotel, or any expenses related to the Onboarding Procedures (as defined below), are included in the Order Form, or if expense reimbursement is expressly authorized in this SOW or otherwise approved in writing (all such expenses shall be referred to as **"Expenses"**), Snowflake will work in good faith directly with Customer to plan such Expenses in connection with the provision of the Technical Services. All Expenses shall be invoiced by Snowflake and are payable by Customer for expenses approved and incurred during the Term in addition to the applicable fees.

3. **Billing and Ship-To Information.** The Order Form will specify applicable bill-to and ship-to addresses. Any onsite Technical Services will be delivered to the ship-to address, if provided. If no address is provided, any onsite Technical Services will be provided to the Billing address unless otherwise agreed to by the parties.

C. Scheduling and Term

1. **Term.** The "**Term**" for each Technical Services offering described in this SOW shall be as specified in the Order Form or, if not specified, shall be twelve (12) months starting from the SOW Effective Date. Each Technical Services offering will be provided only during its applicable Term, and Customer shall not be due any credit or refund for any Technical Services not consumed during the applicable Term (including without limitation unused hours, training, credits, or packages). Unless otherwise specified in the Order Form, this SOW expires on the earlier of completion of the Technical Services offering(s) or expiration of the Term(s) for the Technical Services offering(s).

2. **Scheduling.** Technical Services are provided only during regular business hours (8am to 5pm local time), Monday through Friday (holidays excluded). Unless otherwise agreed to by the parties herein, all Technical Services, other than public training, must be scheduled in advance in one-week increments on mutually acceptable dates. Public training is scheduled online at training.snowflake.com.

3. **Available Hours.** For Technical Services performed on a time and materials basis (whether pre-paid or in arrears), the Technical Services will be subject to the availability of hours specified in the Order Form. Hours listed in the Order Form are provided as an estimate only and additional hours may be required for completion of all activities. If additional hours are required, the parties must mutually approve and execute a Change Order.

D. Snowflake Access

1. This Section describes access to Customer Data and other Customer Assets, if any. "**Customer Asset**" means Customer Data, Snowflake Service accounts, and other equipment, laptops, systems, applications (including External Data Applications), virtual desktop infrastructures, environments and networks provided by or on behalf of Customer; "**Customer Data**" means any data or data files of any type that are uploaded by or on behalf of Customer for storage or processing in the Service; and "**External Data Applications**" includes systems or applications from which data is being migrated or through which data is being transmitted for upload to the Snowflake Service, such as another data warehousing application, data source system, or ETL tool.

2. **Scope of Snowflake Access**. Under this SOW, Snowflake will receive access to:

Customer's Snowflake Service account: • Non-Production: • Production:	Yes Yes No
Customer Data:	Yes
Applications for project management or collaboration (e.g., email, Jira, Slack, etc.):	Yes
Read-only access to External Data Applications:	Yes

3. **Method of Access.** For the access set forth in the Section D(2) above, the parties agree that Snowflake will use its laptops and/or virtual desktop infrastructure (VDI) to access Customer Assets unless and until Customer provides Snowflake with its laptop and/or VDI and directs Snowflake in writing to use such method(s) for access. Where Snowflake is accessing Customer Assets with its own laptops, Customer acknowledges that Snowflake laptops are based on standard Snowflake configurations and policies and are not customized to meet any Customer specific security requirements. Any Customer provided laptop must include hard drive encryption and industry standard anti-malware solutions.

4. **Snowflake Obligations.** For access to Customer Assets identified in this SOW, Snowflake agrees to: (a) use Customer Data and/or other Customer Assets only for performing the services under this SOW; (b) use reasonable efforts to avoid circumventing or attempting to compromise computer or network security measures on Customer Assets such as security software or network access controls; (c) not share passwords for Customer Assets with another person unless otherwise instructed by Customer.

5. **Customer Obligations.** Customer shall ensure that: (a) multi-factor authentication (MFA) is configured and enabled for any Snowflake resource to be able to log-in and access any Customer Assets; (b) each Snowflake resource with access to any Customer Assets (if any) receives a unique user ID and password; (c) only the minimum necessary access and privileges to Customer Assets (if any) required for the individual to fulfill the services under this SOW will be provided; (d) the duration and scope of access to the Snowflake Service account, and/or to Customer Assets (if any) is strictly limited to the access specified hereunder; (e) Customer Assets to which Snowflake is provided access have been configured to prevent Snowflake personnel from committing code changes or otherwise making changes to the Customer Assets that will impact production environments or production data; (f) Snowflake personnel will not be provided with or requested to use software or other code for Snowflake's systems and/or equipment which could allow any party other than Snowflake to access or use such systems and/or equipment (e.g., remote server services software or SSH access to a laptop); and (g) secure remote access configurations to networks (if any) are configured to prevent local network connection(s) to networks and only allow those connections required to perform the services under this SOW. Without reducing any of Snowflake's privacy and security obligations under the Agreement, Snowflake will have no liability to the extent such liability arises from or is related to access received in breach of this SOW. Customer is solely responsible for the security and technical measures of any Customer Assets (including for monitoring, management, configuration, support and maintenance), connections to/from the foregoing, and for user ID/password management. Where access is no longer required to provide services under this SOW or this SOW otherwise terminates, Customer shall ensure that Snowflake's access is terminated and credentials revoked.

6. **External Data Applications.** If Snowflake receives access to External Data Applications (as permitted hereunder) or other Customer-managed applications, then the selection and configuration of such applications (and connections to and from the foregoing) are Customer's sole and exclusive responsibility. Customer will not grant roles in External Data Applications or other Customer-managed applications that allow Snowflake personnel to transfer data to any destination not approved by Customer, and shall ensure Snowflake has the right to access the External Data Application or other Customer Assets.

7. **No Access to Sensitive Data.** Customer shall ensure that Snowflake is not granted access to any sensitive data, including without limitation, any personal data, credit card or other financial account information, or protected health information.

E. Additional Terms

1. Governing Terms. This SOW shall be governed by the Agreement as defined in the applicable Order Form. If the Agreement does not expressly include terms applicable to Snowflake's provision of Technical Services, then for purposes of this SOW, the Agreement shall also incorporate by this reference the terms and conditions of the Snowflake Technical Services Addendum located at https://snowflake.com/en/legal/. In the event of any inconsistency or conflict between the terms and conditions of this SOW and the Agreement, the terms and conditions of this SOW shall govern with respect to the subject matter of this SOW only. Any acceptance of Customer's policies, standards, or other similar requirements by Snowflake resources will not change the parties' commitments or distribution of obligations regarding any access provisions set forth in this SOW. Upon execution of the Order Form, this SOW shall be incorporated by reference into the Agreement. For clarity, Customer's use of the Snowflake Service including Previews is governed by the agreement governing the use of such Snowflake Service, and not this SOW.

2. Change Orders. This SOW (including any of its attachments or exhibits) may not be modified or amended except in a written amendment or change order signed by a duly authorized representative of Snowflake and Customer ("**Change Order**"). Change Orders may result in additional costs and/or modified terms, as mutually agreed by the parties. Any changes in scope defined in Section A1-A4 of this SOW will require a written Change Order and may impact timeline and fees.

3. Project Management. Customer will ensure that a project manager is assigned for the duration of the project who will coordinate meeting schedules and availability of personnel reasonably needed for the delivery of the Technical Services. Customer further agrees to reasonably cooperate with Snowflake and to ensure access to personnel, materials and information as reasonably requested. Customer shall ensure that a secure sharing method is used to share any confidential documents (e.g., network diagrams).

4. Deliverables. All electronic and/or hard copy versions of any materials or other deliverables provided as part of the Technical Services are provided only for Customer's internal use in support of such Customer's use of the Snowflake Service. Without limiting applicable license restrictions in the Agreement, these materials and other deliverables may not be distributed, resold or sublicensed, used to replicate or attempt to perform the Technical Services for others, or used to develop or attempt to develop any of the products or services described therein. The Technical Services and any tools, materials and other deliverables provided or developed hereunder are Snowflake Technology, and Snowflake shall retain all rights (including intellectual property rights), title and interest in and to such items, notwithstanding anything in the Agreement to the contrary. Deliverables are not subject to any maintenance, support or updates.

5. Recordings. Customer may record Technical Services working sessions (excluding those relating to training-based Technical Services) in video or audio format for Customer's internal purposes solely for Customer's use of the Snowflake Service ("**Recording(s)**"), under the following terms and conditions: a) Snowflake and all session participants must acknowledge and consent in advance to any Recording being made; b) in making or accessing any Recording, Customer will be deemed to have acknowledged that such recording constitutes Snowflake's Confidential Information and will be subject to the Agreement protections applicable thereto; c) notwithstanding anything to the contrary in the Agreement, the Recording and any content contained therein is provided "AS IS" without warranty of any kind by Snowflake; and d) Customer acknowledges that the Service is continually being updated and assumes the risk that the Recordings may contain outdated content from time to time.

6. Third Party Software. Snowflake is not responsible or liable for software or components not developed by Snowflake, including third-party SaaS services and open source software components ("**Third Party Software**"). If any Technical Services use Third Party Software or integrations with such software, Customer is responsible for providing and/or enabling integrations with such Third Party Software and for compliance with any applicable third-party license terms.

7. Deployment of Deliverables. The details of how Snowflake will carry out the Technical Services are exclusively set forth in this SOW and the related Order Form. Customer will be solely responsible for determining if, how, and when it will implement, test, release or deploy deliverables (including without limitation any recommendations or best practices) provided by Snowflake.

8. Onboarding. Customer may request that Snowflake personnel that are assigned to perform Technical Services under this SOW ("**Snowflake Resource**") agree to certain of Customer's standard onboarding procedures and related documents ("**Onboarding Procedures**"). To the extent that Customer requests any such Onboarding Procedures during the Term of this SOW, the parties agree as follows:

a. Violation of any Onboarding Procedures by a Snowflake Resource shall not be deemed a breach by Snowflake of its obligations under the Agreement or SOW except to the extent such violation is also in direct violation of any of Snowflake's express obligations under the Agreement or SOW;
b. If any violation of the Onboarding Procedures by a Snowflake Resource does not constitute a breach by Snowflake pursuant to clause (a) above, Customer's sole and exclusive remedy with respect thereto shall be limited to having such Snowflake Resource removed from the engagement upon Customer's written request to Snowflake and replaced as soon as reasonably practicable by Snowflake. Customer acknowledges that any such replacement may result in a delay in performance of Technical Services;

c. Notwithstanding anything to the contrary in the Onboarding Procedures, the terms of any Onboarding Procedure shall not change, supplement, modify, supersede or in any way alter any of Snowflake's or Customer's respective rights, obligations, or allocations of risks and liabilities as expressly set forth in the Agreement or SOW, including without limitation, with respect to any data access, ownership of Deliverables or other intellectual property ownership rights expressly set forth therein;

d. To the extent any Onboarding Procedures conflict with any obligations that the Snowflake Resource owes to Snowflake, including, but not limited to, obligations regarding confidentiality or intellectual property, Customer agrees that nothing contained in the Onboarding Procedures shall supersede, limit, or preclude such Snowflake Resource from complying with their applicable obligations to Snowflake, including complying with Snowflake's policies, codes of conduct, assignments of intellectual property rights, or other terms or conditions of employment with Snowflake; and

e. Customer may not impose non-competition or non-solicitation obligations on any Snowflake Resources or Snowflake, and any terms or policies purporting to do so will be of no effect.
